

ARKADIY KOLOMIETS

FULL STACK DEVELOPER

SUMMARY

I'm a developer with experience in a blockchain-oriented development company. I'm passionate about learning new technology and programming languages. I'm looking forward to taking part in developing the apps that will make this world a better place.

Despite the fact that I am only at the beginning of my journey as a developer, in the near future, I see myself in the position of a Full Stack Web Developer, ready to fully manage projects. My goal in a few years is to grow to the CTO position of a company.

SKILLS

- Back-end programming languages: **Python**
- Back-End Framework: **Django, Django REST framework, Flask, NodeJS**
- Front-end programming languages: **HTML, CSS, JavaScript, Typescript**
